Summary

- Enthusiastic and detail-oriented front-end developer with a strong foundation in HTML, CSS, and JavaScript. Eager to apply my skills to create visually appealing and user-friendly web applications. Currently seeking an entry-level position to gain hands-on experience and contribute to innovative projects. Passionate about learning new technologies and continuously improving my coding abilities.

Projects

CreativeAgency [Dome](#)

The Creative Agency showcases a modern and visually appealing website designed for a creative agency. It features:

- A sleek and professional layout with smooth animations and transitions.
- A responsive design, ensuring a seamless experience across different devices.
- Engaging sections, including an introduction, services, portfolio, testimonials, and contact information

MemoryGame [Demo](#)

- **Memory Game** is an interactive card-matching game where players flip cards to find matching pairs. It likely includes:
- A **grid of cards** that are initially hidden.
- **Technologies:** HTML, CSS, JS

ExpenseTracker [Demo](#)

- The **Expense Tracker** is a web application that helps users **track their expenses** by adding and managing transactions. It likely includes:
- A form to **input expenses**, including the amount, category, and description.
- A **list of transactions** displaying past expenses
- **Calculation of total balance**, income, and expenses.
- Possibly options to **delete** or **edit** transactions.
- **Technologies:** HTML, CSS, JS, Local Storage

HungMan Game [Demo](#)

- The **Hangman Game** is an interactive word-guessing game where players attempt to guess a hidden word letter by letter before running out of attempts.
- **Limited attempts** before the game is lost.
- **Win/loss notifications** based on the correct or incorrect guesses.
- **Technologies:** HTML, CSS, JS
